Capture your customer's attention with "glasses-free" 3D

"Glasses-free" 3D displays deliver great advantages for branding and advertising products and services in public environments.

3D creates audience attention and ensures higher impact in the advertising clutter. The human brain's ability to perceive a message increases up to 200% when the message is presented in 3D.

Our analytics reports prove that 3D-displays generate significantly prolonged dwell-time and increased sales revenue.

24" 3D-tower kit + 3D-production
